## GENERAL SHOOTING PHASE RULES

### Snap Shots

- Snap Shots are always at BS1
- Snap Shots may only be modified by things that state that they affect Snap Shots.
- Any shooting attack that does not use BS cannot be a Snap Shot.
- Template, Blast and Ordnance Weapons cannot be Snap Shots.

### Instant Death

- An allocated wound has Instant Death if the S value of the attack is double the T value of the model or more.
- If a model suffers a wound from an attack with Instant Death, it is immediately reduced to 0 Wounds and removed.

### Cover Saves

- If the model to which a wound is allocated is at least 25% obscured from the view of at least one firing model, it gets a cover save.
- Cover saves are 5+ unless otherwise stated.
- If the model is partially obscured by intervening models from a third unit, it gets a 5+ cover save.
- Models can always shoot through members of their own unit without conferring a save.
- **Obscured** vehicles have cover if 25% of the facing is obscured. If multiple facings are being targeted, use multiple cover values. Simply being in 'area' terrain doesn't count. Default cover save is 5+.
- **Other Facings:** If the firing unit cannot see their correct facing AT ALL, they may target another facing but at +1 cover.

### Going To Ground

- Non-vehicle units may Go To Ground
- Gains +1 cover save or 6+ if in the open.
- Cannot move, Run or Charge
- Can only fire Snap Shots, cannot fire Overwatch
- At the end of it's following turn, it returns to normal.
- Vehicles cannot Go To Ground.

## WEAPON TYPES

### Ordnance:

- Cannot fire Snap Shots
- Non-vehicle models can't fire other weapons that phase.
- Two dice to penetrate and pick highest.

### Pistol:

- Counts as a close combat weapon.
- Any models with two pistols may fire both.

### Rapid Fire:

- May fire two shots within half range.

### Salvo:

- If moved, fires lower number at half range.
- If still, fires greater number at full range.

### Bombs:

- All bombs are One Use Only.
- Fired in the movement phase, but counts as having fired one weapon that shooting phase, and may not move Flat Out.
- Firer must be Zooming or Swooping.
- Nominate one unit the firer moved over and place the blast template on them.
- Scatter is D6"
- Casualties are removed as per Barrage weapons.

### Primary Weapon:

- Roll two dice to penetrate and pick the highest.

## WEAPON TYPE SPECIAL RULES

### Blast:

- Do not roll To Hit - instead place 3" Blast with it's hole over a target model's base/hull, and within range.
- Blast scatters 2D6-BS".
- Models fully or partially under the marker are hit, even if out of LOS.
- Re-rolls must roll both Scatter and 2D6.
- Cannot be fired as Snap Shots
- **Large Blast** uses the 5" marker.
- **Massive Blast** uses the 7" marker.
- **Apocalyptic Blast** uses the 10" marker.
- **Apocalyptic Megablast** uses the 10" marker with different strengths for 5", 7" and 10"

### Barrage:

- As Blast, but cover and allocation is determined from the centre of the marker.
- Vehicle hits are resolved against the side.
- Can fire indirectly at targets out of LOS. In this case, scatter is a full 2D6".
- **Multiple Barrage:** Fire the closest weapon first and determine location. Roll a scatter for each additional shot and place it touching the first marker in the correct direction. If a 'Hit' is rolled, place it anywhere touching a current marker.
- **Apocalyptic Barrage:** Using the marker, scatter the middle circle as normal. For each additional shot the weapon has, roll to see which circle it lands in.

### Destroyer:

- Roll To Hit as normal, then roll on the table instead of To Wound.
- Assume S10 for Instant Death.
- Multiple wounds/hull points do not carry over to other models in the unit.

### Template:

- Every model touched by the template is automatically hit.
- Template must cover as many enemy models in target unit as possible, but may not cover any friendly models at all. Never hits the model firing it.
- Has Ignores Cover, Wall of Death and No Escape special rules.

### Torrent:

- As Template, but the narrow end can be placed up to 12" away and the wide end no closer than the narrow end.

# ASSAULT PHASE

## Charge SUB-PHASE (p45)

1	Nominate a unit and pick a unit to Charge <ul style="list-style-type: none"> <li>- Cannot declare a Charge against a unit it cannot reach, or cannot see.</li> <li>- If the unit fired in the Shooting phase, it can only Charge that unit</li> <li>- If Shooting destroys a transport, a Charge may be declared against the passengers.</li> </ul>
2	Resolve Overwatch <ul style="list-style-type: none"> <li>- All shots are Snap Shots. Weapons that cannot fire Snap Shots cannot fire.</li> <li>- Vehicles cannot fire Overwatch</li> <li>- Overwatch cannot cause Morale or Pinning tests.</li> <li>- A unit being Charged may only fire Overwatch once per turn.</li> </ul>
3	Roll Charge range <ul style="list-style-type: none"> <li>- 2D6"</li> <li>- -2" for any model that Charges through Difficult Terrain.</li> <li>- Dangerous Terrain still causes checks.</li> <li>- <b>Failed Charge:</b> If the range is not enough, no models are moved.</li> </ul>
4	Move initial charging model <ul style="list-style-type: none"> <li>- Move the closest charging model first, into the nearest enemy model by the shortest possible route.</li> <li>- If killed by Dangerous Terrain, pick another initial Charger.</li> </ul>
5	Move the rest of the unit in any order <ul style="list-style-type: none"> <li>- A charging model must end in coherency with a model that has already moved.</li> <li>- If possible, must move into base contact with an unengaged enemy.</li> <li>- If not, then in contact with an engaged enemy.</li> <li>- If not, then in 2" of an engaged friendly (6" vertical)</li> <li>- If not, then just stay within coherency.</li> </ul>
6	Choose another charging unit and repeat the process. <ul style="list-style-type: none"> <li>- Once all units have Charged, move on to Fight Sub-Phase.</li> </ul>

## FIGHT SUB-PHASE (p48)

1	Choose a combat <ul style="list-style-type: none"> <li>- The player whose turn it is chooses the order.</li> </ul>
2	Choose highest Initiative step <ul style="list-style-type: none"> <li>- Starting from 10 and working down.</li> <li>- Skip a step if no models have that I</li> <li>- All models that Charged through Difficult Terrain are at I1, unless they are charging a unit that has gone to ground.</li> </ul>
3	Pile in <ul style="list-style-type: none"> <li>- Models in this I step pile in 3"</li> <li>- First models pile in to get in base contact.</li> <li>- Then models pile in to get within 2" of an engaged model (6" vertical).</li> <li>- Then everyone else piles in.</li> <li>- The player whose turn it is piles in first.</li> <li>- Anyone who is in base contact with an enemy model or within 2" of a friendly model who is (6" vertical) is engaged and can fight.</li> </ul>
4	Determine number of attacks <ul style="list-style-type: none"> <li>- Models in this I step have a number of Attacks equal to their A value.</li> <li>- +1 for charging.</li> <li>- +1 for having two Melee/Pistol weapons.</li> </ul>

6	Roll To Wound
7	Divide into Wound Pools <ul style="list-style-type: none"> <li>- If some wounds have different rules or stats divide into wound pools.</li> <li>- All the wounds from a single pool must be allocated before moving on.</li> </ul>
8	Allocate Wounds <ul style="list-style-type: none"> <li>- Wounds must be allocated to enemy models in base contact with a model attacking at that initiative step.</li> <li>- If there are no models left in base contact, allocate to the closest model.</li> <li>- Roll Look Out Sir! for characters.</li> <li>- The model may take a Saving Throw.</li> <li>- If reduced to 0 wounds, remove.</li> </ul>
9	Fight next Initiative step <ul style="list-style-type: none"> <li>- Once all models have fought, move on to Determining Assault Results</li> </ul>

## DETERMINING ASSAULT RESULTS (p52)

1	Determine assault results <ul style="list-style-type: none"> <li>- The side that caused the most Wounds is the winner.</li> <li>- If both sides suffer the same, draw.</li> <li>- Wounds in excess of a models W characteristic don't count.</li> </ul>
2	Loser takes Morale check <ul style="list-style-type: none"> <li>- -1 Ld for each Wound they lost the combat by.</li> <li>- If they fail, they Fall Back</li> <li>- <b>Our Weapons Are Useless:</b> If locked in combat with an enemy it can't hurt, a unit may choose to fail this check.</li> </ul>
3	Winner must Sweeping Advance <ul style="list-style-type: none"> <li>- Roll D6+1</li> <li>- If the winner is higher or scores are equal, the losing unit is wiped out.</li> <li>- If the loser is higher, it Falls Back.</li> <li>- Winning units that are still locked in combat cannot Sweeping Advance.</li> </ul>
4	End of combat Pile In <ul style="list-style-type: none"> <li>- If the combat is still going, all models Pile In.</li> <li>- The player whose turn it is goes first.</li> </ul>
5	Consolidate <ul style="list-style-type: none"> <li>- If the winning unit is now unengaged, it may consolidate d6"</li> <li>- Difficult Terrain has no effect, but Dangerous Terrain does.</li> </ul>
6	Choose another combat and go back to Fight Sub-Phase.

## MULTIPLE COMBATS (p54)

### Multiple Charges

- Choose a Primary and Secondary target.
- If the unit shot, the same target must be the Primary.
- A unit declaring this is making a Disordered Charge, even if it ends up with no models touching the Secondary.
- Both Charged units may fire Overwatch.
- Initial Charge is the closest model to the Primary target.
- All other models must attempt to get in base contact with the Primary. If they can't, then they may go into base contact with the Secondary.

### Charging into a Multiple Combat

- If charging two units already locked, the I penalty for Difficult Terrain does not apply.

### Fighting Multiple Combats

- A model engaged with only one enemy unit must strike that unit.
- A model engaged with two or more may split its attacks freely between them before rolling To Hit.

### Assault Results

- Total the number of Wounds inflicted per side.
- Every unit on the losing side must take a Morale check with the same penalty.
- If all the losing units fail or are destroyed, all the winning units may Sweeping Advance.

## GENERAL ASSAULT PHASE RULES

### Locked in combat

- If a unit has one or more models in base contact with an enemy, the unit is locked in combat.
- Locked units cannot move, Run, shoot or fire Overwatch if Charged.
- Other units cannot shoot at Locked units.
- Blast markers and templates may not be deliberately placed to hit locked models, but may scatter onto them.
- Locked models do not take Morale or Pinning checks caused by shooting and cannot go to ground.

### Disordered Charges

- Does not gain the +1A bonus for charging.

### Assaulting Vehicles

- All vehicles are WS1(except Walkers and Chariots). Immobilised vehicles are WS0.
- All hits are resolved against rear armour.
- Vehicles cannot Charge, Pile In, consolidate, sweeping advance, or be locked in combat (except Walkers and Chariots).
- For combat results, count a Glancing hit as 1 wound, and a Penetrating hit as 2.
- If a vehicle loses the combat/destroyed, there are no sweeping advances, pile ins or consolidations.
- Vehicles never take Morale or Ld checks.
- Against Vehicle Squadrons, allocate hits instead of wounds as per shooting.

# CHARACTERS

## GENERAL CHARACTER RULES

### Characters in Assault

- When it is the character's turn to Pile In, they must move before other models at the same I step.

### Look Out, Sir!

- When a wound is allocated to a character, it may be reallocated the closest a model in the same unit within 6" on a 4+.
- A wound can be reallocated only once.
- In a unit of characters, this can be reallocated to other characters.
- Cannot be used in a challenge.

## INDEPENDENT CHARACTERS (p166)

### Joining Units

- Must be within 2" coherency of a unit to join it at the end of the Movement phase. Once joined, the unit may move no further.
- Must stay 2" away from units if it is not joining them.
- May not join units who are in Reserves, Locked or Falling Back.

### Leaving Units

- May leave by moving out of coherency.
- May not leave units who are Falling Back, in Reserves, Locked, or Gone to Ground.

### Other effects

- Independent Characters pass Look Out Sir rolls on a 2+.
- Units with an IC do not need a double 1 to regroup if under 25% - test as if it had 25% remaining.
- ICs without Infiltrate cannot join Infiltrating units during deployment.
- ICs who leave units still suffer ongoing effects - ICs who joint units do not suddenly gain them.

## CHALLENGES (p101)

### Issuing Challenges

- Player whose turn it is may nominate a character to issue a challenge first.

- Jump and Jet Pack infantry **may** embark.
- All buildings have Repel The Enemy.
- Buildings are automatically hit in assault.
- Two models may shoot through Fire Points.
- If AV0 or HP0, immediate Total Collapse.
- Moving between parts of a multi-part building will take up all the unit's move.

### Claiming Buildings

- At the start of the game, buildings that are part of an army are 'claimed' and others are 'unclaimed'
- A claimed building is a unit in the player's army and remains so, even if unoccupied.
- If an enemy unit enter the building, they immediately claim it.
- All claimed buildings have the Sentry Defence System special rule.

### Emplaced Weapons

- If a building is occupied, models may fire an emplaced weapon manually. All manual weapons must be fired at the same target.
- If a building is claimed, all non-manual weapons fire at the nearest enemy unit within range/LoS of the weapon at BS2 at the end of the phase.
- Gun Emplacements taken as upgrades count as additional emplaced weapons.

### Battlements

- Battlements are a separate piece of terrain.
- Battlements are an access point.
- Difficult Terrain, but Jump and Jet units do not have to take Dangerous tests.

- All hits are S6 AP- with the Ignores Cover rule, and randomly allocated. - AP2 weapons gain +1 to this table. AP1 weapons gain +2 to this table.			

## GENERAL MORALE RULES

### Morale checks

- Morale checks are always 2D6 against the highest Ld in the unit.
- **Insane Heroism:** A roll of double 1 always passes.

### When to test

- When a unit suffers 25% or more casualties during any phase, test at the end of that phase (except the Assault phase).
- When losing an assault, test with a Ld modifier equal to the number of wounds it lost by.

## REGROUPING (p59)

- Before the unit moves in the Movement phase, they must attempt to regroup.
- If 25% of the squad remains, this is a normal Morale check. If less than 25% remains, this can only be passed with Insane Heroism.
- If failed, Fall Back.
- If passed, regroup 3", not slowed by Difficult Terrain but Dangerous Terrain is as normal.
- This move must be used to restore coherency.
- Regrouped models cannot Run or Charge, but can shoot Snap Shots and Overwatch.

### Regrouping when assaulted

- If assaulted while falling back, a unit must test to regroup when the enemy is found to be in Charge range on it's normal Ld (ignore the 25% rule). If failed, it is destroyed at the end of the Charge sub-phase.

# MORALE

## FALLING BACK (p57)

- Units make a Fall Back move immediately after failing a Morale check. The only moves they can make after this are additional Fall Back moves until they regroup. They will make a Fall Back move every movement phase unless they Regroup.
- The default Fall Back move is 2D6", not slowed by Difficult Terrain but Dangerous Terrain is as normal.
- The move is directly towards their own table edge by the shortest route.
- If a model from the unit reaches the edge, the unit is removed as casualties.
- If falling back from assault, the unit may move freely through enemy models involved in the assault.
- **Trapped:** If the route is blocked, the unit may move around the obstacle, but if it cannot move in any direction, it is destroyed.
- Units that are falling back can only fire Snap Shots, cannot Charge, Run or TB, cannot Go to Ground and pass all Pinning tests.
- Models that are falling back automatically fail all Morale checks.
- Models that are Charged must immediately test to Regroup.
